SKIMMER COVERS

Skimmer Lid - 306mm square
Inlay depths: 8-12, 15-22, 25-32 & 35-42mm
Concrete: 40mm

Skimmer Lid - 412mm square
Inlay depths: 8-12, 15-22 & 25-32mm
Concrete: 40mm

Stop compromising the finish around the skimmer. HIDE Pool Skimmer Covers are concealed, flush-fitting lids designed to support your chosen tile, paver, stone or decking inlay for a seamless pool surround.

They provide a premium alternative to visible plastic skimmer lids and improvised, unsupported stone or tile cut-outs that may crack over time. HIDE's 316L stainless steel lid and frame system supports the inlay, protects the surrounding edges and sits neatly flush underfoot.

Opened using the HIDE Safety Key, the removable cover provides secure access to the skimmer basket for routine cleaning and maintenance.

ACCESS COVERS

Access Cover - 206mm square
Inlay depths: 8-12, 15-22 & 25-32mm
Concrete: 40mm

Access Cover - 306mm square
Inlay depths: 8-12, 15-22, 25-32 & 35-42mm
Concrete: 40mm

Skimmer Lid - 412mm square
Inlay depths: 8-12, 15-22 & 25-32mm
Concrete: 40mm

Conceal essential exterior service points without compromising the surrounding finish. HIDE Access Covers are flush-fitting, removable covers designed to support your chosen tile, stone, paver, decking or artificial grass inlay.

Manufactured from 316L stainless steel, the lid and frame system supports the inlay material, protects the surrounding edges and creates a clean, level finish across patios, pool surrounds, pathways and landscaped areas.

HIDE Access Covers provide practical access to inspection points, plumbing junctions, valves and other exterior services. The cover is removed using the HIDE Safety Key, allowing routine inspection and maintenance while helping prevent unwanted lifting.

DRAIN COVERS

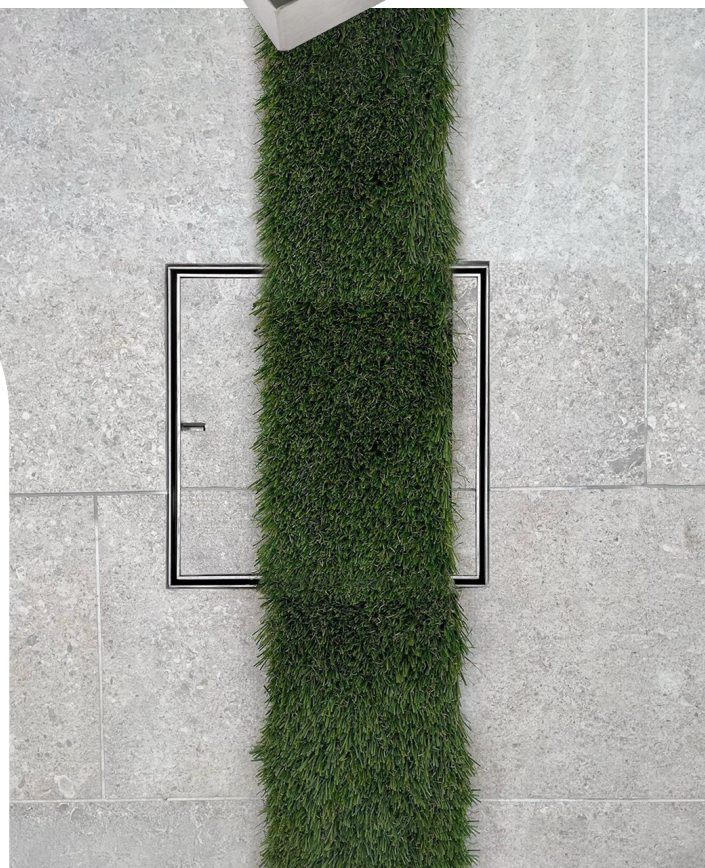

Conceal exterior drainage without compromising the surrounding finish. HIDE Drain Covers are flush-fitting, removable covers designed to support your chosen tile, stone, paver, decking or artificial grass inlay while allowing water to drain through the perimeter gap.

Manufactured from 316L stainless steel, the lid and frame system supports the inlay material, protects the surrounding edges and creates a clean, level finish across patios, pool surrounds, pathways and landscaped areas.

The cover is removed using the HIDE Safety Key, allowing access for inspection, cleaning and maintenance of the drainage point below.

Drain Cover - 314mm square
Inlay depths: 8-12, 15-22 & 25-32mm
Concrete: 40mm

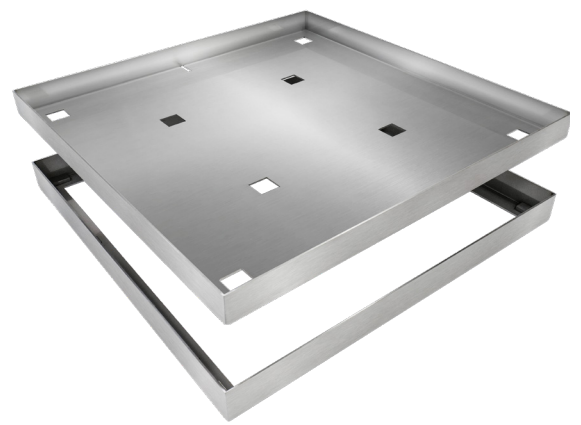

MANHOLE COVERS

Conceal large exterior service access openings without compromising the surrounding finish. HIDE Manhole Covers are large, flush-fitting removable covers designed for access points that may require full-person entry for inspection or maintenance.

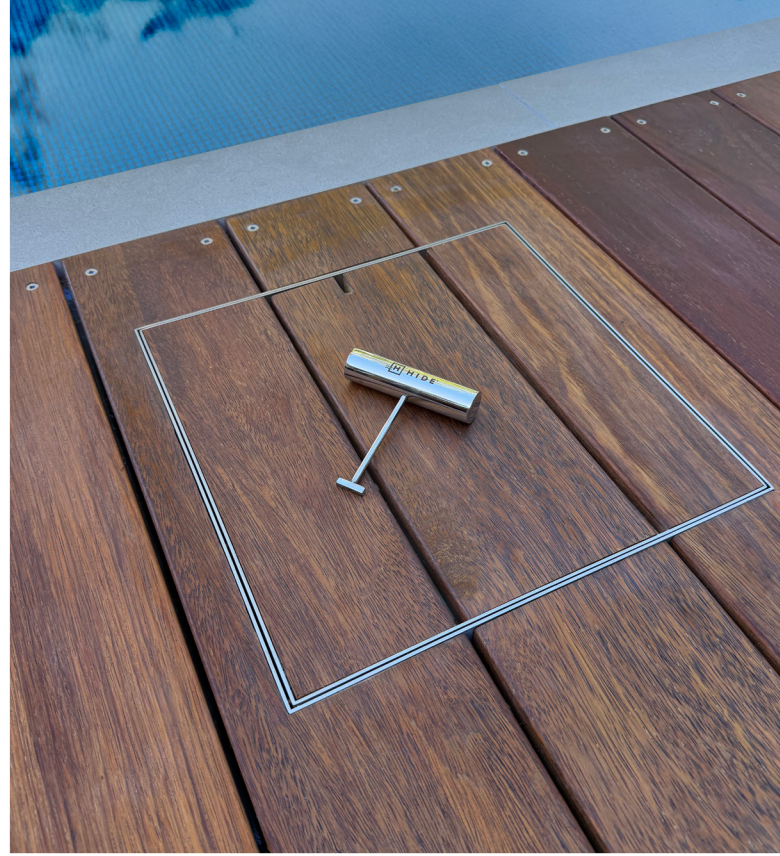

Available in 506mm and 656mm sizes, the 316L stainless steel lid and frame system supports your chosen tile, stone, paver or other securely bonded exterior inlay. This allows the surrounding surface pattern to continue through the cover for a discreet, level finish.

The cover is removed using the supplied lifting keys, providing practical access to underground tanks, sewer inspection points, equipment chambers and other exterior services.

Access Cover - 506mm (Manhole size)
Inlay depths: 15-22 & 25-32mm
